

LiquiDrainer

Emptying and compaction

Automatic emptying of full
beverage containers

Partner of beverage industry

The **LiquiDrainer** empties **automatically** and **fast** filled PET bottles, Tetra Pak® and beverage cans. Even entire packages can be emptied easily. High-cost opening by hand is over. Ca. **7,500 1-l-bottles** are emptied **per hour**. The innovative emptying concept of the **LiquiDrainer** is **sustainable** and **economical**.

Safety and Profitable disposal

The **LiquiDrainer separates liquids and outer packaging** and enables a profitable disposal. Emptied and pre-compacted packaging is pushed out by the material that follows. The LiquiDrainer devaluates the bottles reliably, so that there is no risk of abuse. The **liquids are collected separately** and can be marketed profitably. The pre-compacted beverage containers can be **further compacted by baling and briquetting presses** and can be marketed profitably as well.

Clean disposal

When liquids drain off unregulated it leads to **unclean work areas** which means a **massive number of insects** during summer months. The threat of being stung is connected to the **rate of illness** which costs time and money for the company. The **LiquiDrainer** provides a properly work surace so that there is no risk of annoying smell or insects. Staff is available and the disposal is clean.

Quality preservation & image

Frequently beverages return rom the retail markets to the producer or **failed batches** are produced and beverages do **not serve standards of quality**. The producer has to make sure that no defective beverages reach the market. This could cause an **incalculable loss of image**.

The **LiquiDrainer** empties **filled beverage** containers saely and reliably. The company has an independent disposal concept and does **not depend** on any **service provider**. No deective beverages leave the company.
